Happily Natural Day is a means through which people of African descent can raise their collective consciousness & awareness by uniting in the effort to demolish the inferiority complexes that have developed throughout the African Diaspora due to our ever-present war with the ideology of white supremacy. It is also an opportunity for other cultural groups to be enlightened. Happily Natural Day is a celebration of black consciousness whose main purpose is promoting the importance of raising black consciousness and African awareness throughout the Black Diaspora to combat the debilitating psychological effects of the white supremacy on African people worldwide. Happily Natural Day is designed to do away with the damaging mindsets that have been created by conformity, assimilation and acceptance of and to the tenets of white supremacy in the United States and abroad.
